What is 'Awa?

'Awa, also known as kava, or kava kava (*piper methysticum*) is a plant originating in the Pacific Islands.

'Awa is consumed for its sedating effects and helps create relaxation and alleviate anxiety.

'Awa was and is still used by Pacific Islanders for ceremonies, rituals, and social gatherings.

Chiefs would gather and consume 'awa before making important decisions impacting their villages and neighboring people.

Traditionally, 'awa is strained into a kanoa, or a "kava bowl", and consumed out of coconut bowls.

CAUTION:

The FDA advises that a potential risk of rare, but severe liver injury may be associated with 'awa.

Keep out of reach of children.

'Awa is intended for healthy adults, 18 years of age or older.

Do not take if nursing or pregnant.

If taking prescription medication, consult with your physician before using.

Do not drive or operate heavy machinery shortly after consuming 'awa.
